## RULES FOR RECORDING AND REPORTING NAIA FOOTBALL STATISTICS

NOTE: All yardage reported is to be NET yardage. Subtract losses from gains to get net.

### RUSHING

1. All offensive running plays are to be classified as rushing plays, **not** as "plays from scrimmage," since any play begun with a snap-back from center actually is a play from scrimmage.
2. Rushing yardage is measured from the line of scrimmage to the point where the ball is declared dead, or is recovered by opponents in the case of a fumble.
3. All gains on lateral passes which originated or grew out of a rushing play are included in rushing yardage.

### FORWARD PASSING

1. Forward passing gains or losses are measured from the scrimmage line to the point where the ball is declared dead (or is recovered by opponents in the case of a fumble), so as to include both length of pass and running advance after completion. All yards gained or lost on each completed pass play are credited to both the passer and the receiver.
2. Loss from a completed forward pass which did not advance the ball to the scrimmage line is a yardage charge against passing gain.
3. Any loss by a player apparently intending to pass, but thrown behind the line of scrimmage, is recorded as a **loss by rushing**. He is **not** a passer until he has thrown the ball, and he retains at all times the option of running.
4. Interception returns are measured from the point of interception to the point where the ball is declared dead (or is received by opponents in the case of a fumble.)
5. There is no pass completed by penalty. A gain through interference on a passing play is a penalty against the defending team. The passer is not charged with a pass attempt, nor credited with a pass completed or yards gained; nor is the intended receiver (or the player interfered with) credited with a pass caught. The passing team is credited only with a penalty, and the distance from the line of scrimmage to the spot of the penalty, under "yards penalized."

### LATERAL PASSING

1. A lateral pass is always a component part of the ultimate play, whether it precedes or follows that play, since the lateral is merely an extension of the original or ultimate play, in effect.
2. Incomplete lateral passes are scored as fumbles, and yards lost are charged against the player who, in the scorer's opinion, was responsible for the failure of the pass.
3. Intercepted lateral passes are scored as fumbles, the offensive team being charged with a fumble lost.
4. The official scorer rules on whether a completed pass to a flanker or man-in-motion is a forward or a lateral pass. If the latter, the play is recorded under "rushing." If the pass is incomplete, the subsequent action of the officials reveals whether the pass is a forward or a lateral.
5. The original ball carrier is charged with an attempt (carry) and is given yardage to point of the lateral. The subsequent ballcarrier(s) are **not** charged with an attempt (carry) but do receive credit for yardage gained or lost from point of lateral.

### TOTAL OFFENSE

1. Total offense is the combined result of rushing and forward passing only, since these two are the only methods by which legal advance can be initiated while retaining possession of the ball.
2. Total offense yardage is the total of net gain by rushing and net gain by forward passing. "Receiving" yards gained are **not** included in total offense.

### PUNTS

1. Punts are measured from the line of scrimmage to the point where the ball is touched or caught by an opposing player after it has passed the original line of scrimmage.
2. If an opposing player gains possession of the ball, he is not charged with a punt return attempt unless he attempts to return the ball. If he attempts to return the ball, he is charged with

yards gained attempting to return a punt, or yards lost, depending on where the ball is declared dead or is lost by a fumble.

(Please note that a player may be charged with MINUS YARDS on a punt return.)

3. When a punt goes over the goal line (a touchback), distance of the punt is measured from the line of scrimmage to the goal line under new rule adopted in August of 1965.
4. Punts blocked are included in "times kicked", and the yardage of a partially blocked kick is included in "yards kicked". If the ball travels toward the kicker's goal and is recovered by the blocking (defending) team, the yardage is treated as a punt return by the player who blocked the kick. If the ball travels toward the kicker's goal and is recovered by the kicking team, the yardage is treated as a kick return by the player who blocked the kick, but the blocking team is charged with a fumble lost.

### KICK RETURNS

1. Only the number of punts and kickoffs which the receiving team actually attempts to return are included under kick returns.
2. The return shall be measured from the point where the returning player actually attempts to return the ball to the point where the ball is declared dead or is lost by a fumble. Please note that a player may be charged with MINUS YARDS on a punt return attempt.
3. The return of an attempted field goal, which falls short and is returned by the defending team, is treated as a punt return.

### FREE KICKS

1. Free kicks are recorded as kickoffs, if made from placement, and as punts, if the ball is punted. The receiving player is credited with a kickoff return, or a punt return, respectively.

### FIELD GOALS

1. Successful field goals are measured from the "foot", that is where the ball was held when kicked, to the goal post. The ten yards between the goal line and goal posts are included in the distance. The distance of such kicks is not recorded under "punting."

### POINTS AFTER TOUCHDOWNS

1. A player attempting a try for point-after-touchdown by kicking is not charged with an attempt when a bad pass from center, or a fumble by the ball holder, precludes an opportunity to kick. Such an unsuccessful attempt is charged to the "team," rather than to any individual player. However, if the ball is momentarily fumbled and then kicked, an attempt is charged to the individual kicker, regardless of the success or failure of the effort.
2. When try for point-after-touchdown by passing is successful, receiver is charged with attempt and with point scored. When pass is unsuccessful, passer is charged with attempt. When point is scored by rushing, ball carrier is credited with attempt and point.
3. All members using the optional one or two-point system of point-after-touchdown must list double entry under PAT scored. Be sure your total points check on this item.

### SAFETIES

1. No individual credit is recorded for any player on either team when a safety is scored. The team benefiting from the score is credited.

### FUMBLES

1. On any play terminated by a fumble, the yards involved to the point of recovery are credited or charged to the player who fumbled, regardless of which team recovers the fumble.  
(Example - On rushing play, ball carrier of Team A fumbles at the line of scrimmage and the ball travels 5 yards toward Team B goal line, before it is recovered by Team B. Player of Team A who fumbled is credited with rushing gain of 5 yards, and Team A is charged with a fumble lost.)

### WILD PASS FROM CENTER

1. Any loss resulting from an obvious wild pass from center is charged to "center pass", and not to any individual player.

#### GENERAL INSTRUCTIONS

The home team statistician is the official statistician and should provide a copy of the statistics, both team and individual to the visiting team upon request. However, it is desirable for both home and visiting statisticians to work together so that game statistics of each will agree.

Any appearance in a game while the clock is running constitutes a game played even though the player does not come in contact with the ball.

Include only results of games played against four-year, degree-granting institutions. Games against junior colleges, service teams, semi-pro teams, club teams, and alumni teams are not reportable.
